

AMBER SYED

Frontend Developer | React, JavaScript & Responsive Web Design

Lahore, Pakistan | ambersyed462@gmail.com | +92 322 9653604 | Portfolio | GitHub

PROFILE SUMMARY

Results-driven Frontend Developer with 3+ years of experience architecting responsive, high-performance web applications and dashboards using HTML5, CSS3, JavaScript, and React. Proven track record of translating complex UI/UX designs into pixel-perfect, accessible, and scalable interfaces across SaaS, e-commerce, healthcare, and B2B platforms. Adept at component-based architecture, cross-functional collaboration, and writing clean, maintainable code that balances performance with usability.

EXPERIENCE

Frontend Developer — Glomico

12 Months

- Architected and engineered dashboard and front-end interfaces using React, converting design specifications into responsive, production-ready components.
- Partnered with product and design stakeholders to develop interactive, component-based UI features, strengthening consistency and reusability across the application.

Frontend Developer — Healthcare Platform

6–10 Months

- Designed and developed the front-end for a healthcare platform, prioritizing usability and clarity for a non-technical user base.
- Engineered responsive, accessibility-focused interfaces aligned with usability best practices to support patients and clinical staff.
- Collaborated with stakeholders to translate healthcare workflows into intuitive, user-friendly screens.

Frontend Developer — Metro-Online (B2B Platform)

1 Year

- Built dashboard interfaces and the company website front-end using HTML, CSS, and JavaScript, incorporating React for select interactive features.
- Partnered closely with cross-functional teams to implement and ship B2B platform features on the front-end, from planning through deployment.
- Ensured cross-browser compatibility and consistent UI behavior across the platform's core modules.

PROJECTS

TaskFlow — Project Management Dashboard

[React](#) · [Context API](#) · [Drag & Drop](#) | [Live Demo](#) · [Source Code](#)

Engineered a Jira/Linear-style dashboard featuring a drag-and-drop Kanban board, list view, detailed task views with comments and subtasks, and team workload visualizations, using React and Context API for global state management.

WishStore — E-Commerce Store

[HTML](#) · [CSS](#) · [JavaScript](#) | [Live Demo](#) · [Source Code](#)

Developed a multi-page fashion storefront with a fully functional cart, wishlist, category filters, sorting logic, and an end-to-end checkout flow.

Tasty Bites — Restaurant Website

[HTML](#) · [CSS](#) · [JavaScript](#) | [Live Demo](#) · [Source Code](#)

Built a fully responsive restaurant landing page featuring a filterable menu, an image gallery with lightbox, a testimonial slider, and a validated contact form.

Pace — SaaS Landing Page

[HTML](#) · [CSS](#) · [JavaScript](#) | [Live Demo](#) · [Source Code](#)

Crafted a polished marketing landing page for a project-management SaaS product, complete with an interactive live demo widget and a structured feature breakdown.

SKILLS

Languages & Core: HTML5, CSS3, JavaScript (ES6+) | **Frameworks:** React, Context API | **Tools:** Git & GitHub

Core Competencies: Responsive Web Design, UI Development, Component-Based Architecture, REST API Integration

EDUCATION

BSCS — Computer Science

Punjab University — Completed 2022
